

What is Required from You

Since this is a virtual eDesign package, we need your assistance in gathering the required information about your space and the important items you wish to incorporate into your new design.

Measurements

You will be required to supply a layout – house plans or hand drawn plans – with the measurements of the room or space you are purchasing this package for. You will find a document in the **FILES & MEDIA --> REQUIRED OF YOU GUIDE** folder of an example with important notes on how to take the measurements correctly.

Furniture & Items

If you are planning to keep any current furniture or other important items to incorporate into the new design, we will need measurements of these items. (Height x width x depth). You will find a document in the **FILES & MEDIA --> REQUIRED OF YOU GUIDE** folder for you to record everything we need. There will be a sample of how we wish for you to record.

Pictures & video

We will need to see your space as it currently is. Therefore, we will need you to take pictures and a video for us. We have created a folder in **FILES & MEDIA --> BEFORE** for you to submit these images. Please do not use zoom or wide angle while taking these pictures and they skew the size and shape of the room. We will also need you to photo document the furniture and items you wish to use.

We will be sure to let you know if we need anything else along the way. If you have any trouble completing any of this, please message us in the studio's messaging center, and we will assist in anyway we can.

Questionnaires

To gain as much insight as we can into your style preferences, wish list and requirements for your space, we will require you to answer a questionnaire prior to the initial design consultation. Throughout the design process, we may require you to fill out additional questionnaires to help us further personalize your design and product selections.
